Practical, Powerful and User Friendly Reporting

Customization

In rare occasions or when ad-hoc reports become a necessity, customized reports can be created. There are three options available: DLL, Report Writer and Open Tools. DLL provides a direct link from the software system and all reports are in native computer code. Therefore it is faster and easily accessible. Report Writer provides a convenient way for the MIS department to create own custom reports. Open Tools such as Crystal Reports provide more advance features in custom reporting and are easily obtainable of the shelf.
